### **Objective:**

Aspiring Junior DevOps Engineer eager to leverage skills in Docker, Kubernetes, and AWS to enhance infrastructure automation and CI/CD pipelines in a collaborative environment.

### **Education:**

*Bachelor of Computer Science, Metropolitan State University of Denver, Mathematics Minor, May 2017*

Web Developer Bootcamp, Ironhack Miami, July 2021

### **Experience:**

#### *Fjellworks Software*

Fullstack Developer | 05/2024 - Present

- Delivered end-to-end solutions with Docker containerization for seamless deployment and scalability, enhancing infrastructure automation.
- Implemented CI/CD best practices ensuring maintainable and production-ready solutions, aligning with DevOps methodologies.
- Integrated AI agents to optimize workflows and enhance data analysis across client projects.

#### *Proscia Inc*

Software Engineer | 09/2021 - 05/2024

- Upgraded codebase to Vue 2 and integrated CI for automated testing and deployment processes, contributing to continuous delivery improvements.
- Containerized applications using Docker and managed Kubernetes operations for scalable deployments.
- Developed regulatory documentation for compliance, ensuring secure and resilient infrastructure.

#### *Freewave Technologies*

Unity Developer Intern | 08/2018 - 06/2019

- Wrote core functionality for an augmented reality tool, automating build processes and enhancing deployment efficiency.
- Added iOS support and unit tests, improving system reliability and performance.
- Launched the tool for beta testing, showcasing effective collaboration with senior engineers.

### **Skills:**

Docker | Kubernetes | CI/CD | AWS | Git | Python | Infrastructure Automation | Cloud Platforms | Continuous Delivery | Agile Methodologies
